RISK MANAGEMENT

HAZARDOUS WASTE & MATERIALS

Certified Environmental Specialist

The Certified Environmental Specialist Course is designated for Environmental professionals who want to maximize their environmental compliance efforts and for their public safety at workplace. This qualification provides essential knowledge and understanding of EPA regulations related to hazardous wastes such as the Clean Air Act (CAA), Clean Water Act (CWA), RCRA, EPCRA, TSCA and CERCLA. IT will enable those who complete the qualification to implement the most updated environmental compliance programs at the facility.

\$925/24 hours - Coming Soon

Introduction to ISO 14000

This course has been designed to provide basic knowledge about the environment, environment management systems (EMS), ISO 14000, the relation between ISO 9000 and 14000, the integration of ISO 14001 and 9001, and the requirements of ISO 14001. The primary purpose of ISO 14000 series is to prevent pollution, protect the environment and improve the environmental performance of all kinds of organizations.

\$25/1 hour

ISO 9001:2000 Management Overview

This course is ideal for managers who cannot allocate more than 2 hours for training on the new ISO 9000:2000.

\$89.95/2 hours

ISO 9001:2000 Internal Auditor

Once a company has set up their ISO 9001 Quality System, they will need to perform regularly scheduled internal audits. This course will show you how the system is working and how you can continue to improve it.

\$159.95/6 hours

The Clean Air Act

This module contains information pertaining to the Clean Air Act. The Clean Air Act describes one of a number of pieces of legislation relating to the reduction of atmospheric pollution.

\$45.00/2 hours

Introduction to OSHA 18001

This course is based on the recognized assessment specification OHSAS 18000. Taking this course can reduce risk, help you and your company stay in compliance with legal requirements, and improve overall performance.

\$25.00/1 hour

Hazards of Asbestos

Asbestos is a substance that has been used for centuries. Its heat-resistant properties make it almost indestructible; due to this property, asbestos have been widely used in the construction industry, especially for pipe and boiler insulation. Before 1973, asbestos was sprayed onto different surfaces for fire protection purposes, but this practice was banned due to the hazardous nature of asbestos. Furthermore, it is no longer used for insulating pipes and boilers. However, asbestos can still be found in many older buildings. Those who work in construction, repair, demolition and renovations are at a greater risk of contracting asbestos-related diseases such as asbestosis, lung cancer, and mesothelioma. There is no safe level for exposure to asbestos. This course introduces the students to the hazards of asbestos in the workplace and provides information about the measures that must be taken in order to minimize the effects of exposure to asbestos.

\$20.00/ 1 hour

Asbestos Inspector Refresher

This course provides students with a general overview of the physical characteristics of different types of commonly used asbestos, as well as a general overview of some of the common uses of asbestos. During this course students will review the relationship between asbestos exposure and the potential health effects related to such exposure. Another important aspect of the Asbestos Inspector Refresher course pertains to certification. During this course, students will review the certification requirements for building inspectors and the basic elements of a thorough building inspection. It is important that Asbestos Inspectors be well versed in the various topics related to the inspection for asbestos. This course is an excellent resource for reviewing and refreshing your knowledge of key aspects involved in the role of the Asbestos Inspector.

\$159.95/4 hours

Hazardous Materials

Hazardous materials are considered any substance or compound that has a capability of producing adverse effects on the health and safety of humans. Every year thousands of workers get injured or killed because of fatal chemical or other toxic hazards. OSHA and other authorities have provided many rules and regulations in order to prevent hazards and perform safe operations at the workplace

\$20.00/ 1 hour

OSHA HAZWOPER

HAZWOPER stands for Hazardous Wastes Operation and Emergency Response. Hazardous wastes are major sources of workers' injuries and fatalities in workplaces. This course gives you a basic understanding of OSHA standards and its role in the prevention and elimination of workers' injuries and fatalities due to hazardous wastes present at workplaces.

\$20.00/ 1 hour

Materials Handling

This course introduces the hazards that are involved in the handling and storage of materials. Different methods of handling and storage are discussed, the hazards they pose to workers and the methods by which these hazards can be reduced or eliminated from the workplace.

\$20.00/ 1 hour

Ergonomics

Employees who work in non-office environments are routinely required to carry out tasks that involve movement and physical exertion. These forceful exertions associated with such tasks may lead to fatigue, musculoskeletal disorders, and other serious injuries. This course is designed to help employees identify work-related problems and learn to apply the principles of ergonomics in order to make their jobs less physically demanding, thereby increasing their overall efficiency.

\$25.00/ 1 hour

Ergonomics for Non-Office Workers

Employees who work in non-office environments are routinely required to carry out tasks that involve movement and physical exertion. These forceful exertions associated with such tasks may lead to fatigue, musculoskeletal disorders, and other serious injuries. This course is designed to help employees identify work-related problems and learn to apply the principles of ergonomics in order to make their jobs less physically demanding, thereby increasing their overall efficiency.

\$25.00/ 1 hour

Hazardous Waste Training

This course is designed to provide you the basic information about hazardous materials and Hazardous Material Regulations ("HMR"). Also, after completing this course, you will be able to determine the required shipping documents and other necessary requirements of dealing with the hazardous material.

\$25.00/1 hour

General Safety: Hazardous Materials Advanced

This course is designed for workers who are interested in learning about the OSHA Outreach Training Program. Topics including learning what the program is, what topics are covered, what a person needs to be involved

\$49.00/2 hours

HAZWOPER 8 hour Annual Refresher Course

This course meets the requirements in OSHA 29 CFR 1910.120 for eight hours of annual refresher training for workers at hazardous waste sites. This course is designed for general site workers who remove hazardous waste or who are exposed or potentially exposed to hazardous substances or health hazards. Topics include HAZWOPER regulations, safety and health plans, hazardous chemicals, safety hazards, air monitoring, medical surveillance, site control, decontamination, personal protective equipment, and respiratory equipment. This course covers the topics in OSHA 29 CFR 1910.120. Prerequisites: Enrollment is open to those who have already completed the 40-hour or 24-hour HAZWOPER training.

\$95.00/8 hours

HAZWOPER 24 Hour Course*

HAZWOPER 24 Hour is required for employees visiting an Uncontrolled Hazardous Waste Operation mandated by the Government. This course covers broad issues pertaining to the hazard recognition at work sites. OSHA has developed the HAZWOPER program to protect the workers working at hazardous sites and devised extensive regulations to ensure their safety and health. This course, while identifying different types of hazards, also suggests possible precautions and protective measures to reduce or eliminate hazards at the work place.

*This course fulfills your requirements for certification under 29 CFR, Part 1910.120 (e), or other applicable state regulations for certification to the 24-hour Occasional Site Worker level.

\$295.00/24 hours

Industrial Emergency Response: Hazardous Materials First Responder Operations - Level II

This course is designed for all employees who respond to a hazardous materials emergency. As per OSHA guidelines, these people must receive training based on their level of activities at the incident. This particular course is designed for those who are likely to respond to a hazardous materials emergency for the purpose of protecting person, property, or the environment from the effects of the release. OSHA regulations require a minimum of 8 hours training.

\$150.00/ 8 hours

HAZWOPER 40 hour Course

This course is specifically designed for workers who are involved in clean-up operations, voluntary clean-up operations, emergency response operations, and storage, disposal, or treatment of hazardous substances or uncontrolled hazardous waste sites. Topics include protection against hazardous chemicals, elimination of hazardous chemicals, safety of workers and the environment, OSHA regulations. This course covers topics included in 29 CFR 1910.120. Please note that hands-on training is not required for the 40 hour Hazwoper course; although hands-on is the preferred training method by OSHA. To be in compliance with OSHA regulations, the employee must complete 3 days of hands-on training offered by the employer.

\$475.00/40 hours

Industrial Emergency Response: Hazardous Materials First Responder Awareness-Level I

This course is designed for all employees who respond to a hazardous materials emergency. OSHA 29 CFR 1910.120 indicates that all employees who respond to a hazardous materials emergency must receive training based on their level of activities at the incident. Awareness-level training is for responders who are likely to witness or discover a hazardous materials release and will initiate a response sequence by notifying the proper authorities of the release. The course covers the topics addressed in OSHA 29 CFR 1910.120.

\$150.00/ 8 hours

Currently, Industrialinstitute.com is an approved provider of Wastewater continuing education for the following states: Alabama, Florida, Idaho, Ohio, South Carolina, Tennessee and West Virginia.

WATER & WASTEWATER

Stormwater Management During Construction

This course has been developed for the Erosion Control Supervisor Responsible for the proper installation, maintenance and inspection of Best Management Practices (BMPs) for the control of erosion and sedimentation at construction sites.

\$95.00/ 8 hours

RISK MANAGEMENT

Principals of Risk Management

Patient care may be our first priority, but no business equates to no care. That's why this course is so important to health care professionals. Simply put, the purpose of risk management is to avoid or reduce losses of resources and minimize the effects of losses through planning, organization and administration. Such losses typically result from natural disasters, lawsuits, personnel turnover, business interruption and changes in governmental policy. Among the issues this course discusses are the importance of risk management in health care, loss exposures and the risk management process, and applying the principles of risk management to your practice.

\$16.00/ 1 hour

Personal & Property Loss in Risk Management

Identify and analyze loss exposure in terms of property and personnel.

\$27.00/ 2 hours

Risk Management Program (Compliance)

This training course consists of three parts. Part one will provide you with a general overview of the EPA Risk Management Program Rules and Requirements. In Part two, using the EPA's Risk Management Program inspection checklist, we will cover each of the requirements and clarify exactly what you need to do and document to meet EPA requirements and how to be prepared for a state or EPA inspection. Part three will provide with important tips and resources for achieving and maintaining compliance with the many Risk Management Program requirements.

\$90.00 /4 hours

Confined Spaces

This course encapsulates the safety regulation of the workers working in permit required confined spaces. It instructs about the hazards that may occur during the work in confined spaces..

\$20.00/ 1 hour

OSHA 1926

This course is designed for those in the construction industry who follow state OSHA plans and federal plans. This course discusses the 29 CFR 1926.20, General Safety and Health Provisions, 29 CFR 1926.21, Safety Training and Education, 29 CFR 1926.23, First Aid and Medical Attention, and 29 CFR 1904

\$20.00/ 1 hour

Safety Orientation

Employees may be exposed to many safety and health hazards while on the job. These include chemical hazards, fire hazards, electrical hazards, confined space hazards, etc. This course aims to present an overview of some basic workplace hazards and how employees can protect themselves from them.

\$20.00/ 1 hour

Lockout/Tagout

This course is designed to inform employees about the requirements for lockout/tagout during servicing and maintenance of machines or equipment. Also covered are the requirements of the OSHA Lockout/Tagout Standard, procedures for the application of locks and tags, and a discussion of the types of energy these procedures are designed to control.

\$20.00/ 1 hour

Personal Protective Equipment

It is the employers' responsibility to assess the workplace hazards, and if they are present or are likely to be present, and work practice controls alone are not sufficient, then the employer must provide personal protective equipment to the exposed employees. This course gives you a basic understanding about OSHA's role in prevention and elimination of work-related casualties and fatalities, which can be protected through proper personal protective equipment (PPE).

\$20.00/ 1 hour

General Industry: Basic

This course specifies the materials handling and storage procedures developed by the Occupational Safety and Health Administration (OSHA) to reduce injuries resulting from mishandling or improper storage

\$30.00/2 hours

General Safety- Materials Handling and Storage for General

This course specifies the materials handling and storage procedures developed by the Occupational Safety and Health Administration (OSHA) to reduce injuries resulting from mishandling or improper storage.

\$30.00/2 hours

Lead Safety

Lead is a very toxic substance. People who are exposed to lead or lead compounds may become ill or even die due to lead poisoning. Usually, our bodies remove lead from our systems at a slow rate; however, inhaling even small doses of lead for a long period of time can result in lead poisoning. Workers who are required to work at or near sites that are contaminated with lead are at a greater risk of lead poisoning. This course is designed for workers who work in areas where the hazard of lead contamination exists. The course focuses on the health risks associated with exposure to lead and how workers can protect themselves against lead.

\$20.00/ 1 hour

OSHA - 10 Hour General Industry Outreach Training Program

This course is ideal for supervisors with safety and health responsibilities, and for employee safety and health awareness. Students will be introduced to OSHA policies, procedures and standards as well as general industry safety and health principles covered in OSHA Act Part 1910. Special emphasis will be placed on areas most hazardous using OSHA standards as a guide. Upon successful completion of the course, participants will receive an OSHA general industry safety and health 10-hour course completion card from the Department of Labor. Note: This online course has been reviewed and accepted by OSHA for online distribution.

\$139.00/ 10 hours

OSHA – 10 hour Construction Industry Outreach Training Program

This course is designed for construction workers, foremen, job supervisors, and anyone involved in the construction industry. OSHA recommends Outreach Training Program courses as an orientation to occupational safety and health for workers covered by OSHA 29 CFR 1926. Workers must receive additional training, when required by OSHA standards, on the specific hazards of the job. Upon successful completion of the course, participants will receive an OSHA 10-Hour Construction Outreach DOL course completion card within 4-6 weeks.

\$139.00/ 10 hours

OSHA – 10 hour Construction Industry Outreach Training Program – Spanish

This course is designed for construction workers, foremen, job supervisors, and anyone involved in the construction industry. OSHA recommends Outreach Training Program courses as an orientation to occupational safety and health for workers covered by OSHA 29 CFR 1926. Workers must receive additional training, when required by OSHA standards, on the specific hazards of the job. Upon successful completion of the course, participants will receive an OSHA construction safety and health 10-hour course completion card from the Department of Labor. Note: This online course has been reviewed and accepted by OSHA for online distribution.

\$139.00/ 10 hours

OSHA - 30 hour General Industry Outreach Training Program

The OSHA 30 Hour General Industry Outreach Training course is a comprehensive safety program. Specifically devised for safety directors, Operations Management and floors supervisors; the program provides complete information on OSHA compliance issues. OSHA recommends Outreach Training Programs as an orientation to occupational safety and health for workers covered by OSHA 29 CFR 1910. General industry workers must receive additional training, when required by OSHA standards, on specific hazards of the job.

\$295.00/ 30 hours

OSHA – 30 hour Construction Industry Outreach Training Program

The OSHA 30 Hour Construction Industry Outreach Training course is a comprehensive safety program designed for anyone involved in the construction industry. Specifically devised for safety directors, foremen, and field supervisors; the program provides complete information on OSHA compliance issues. OSHA recommends Outreach Training Programs as an orientation to occupational safety and health for workers covered by OSHA 29 CFR 1926. Construction workers must receive additional training, when required by OSHA standards, on specific hazards of the job.

\$295.00 / 30 hours

OSHA 10 & 30 hour General Industry Outreach Courses

This course is designed for construction workers, foremen, job supervisors, and anyone involved in the construction industry. OSHA recommends Outreach Training Program courses as an orientation to occupational safety and health for workers covered by OSHA 29 CFR 1926. Workers must receive additional training, when required by OSHA standards, on the specific hazards of the job. Upon successful completion of the course, participants will receive an OSHA construction safety and health 10-hour course completion card from the Department of Labor. Note: This online course has been reviewed and accepted by OSHA for online distribution

\$395.00/ 40 hours

OSHA 10 & 30 hour Construction Outreach Courses

This course covers thirty (30) hours of training, required by the Occupational Health and Safety Act (OSHA), that apply toward the 30-hour Construction Industry course completion card. The course is comprised of 25 sections, each either one or two hours in length, and covers topics pertaining to regulations covered by Standard 29 CFR 1926. The successful completion of this course will help meet the Construction Industry standards established by OSHA.

\$395.00/ 40 hours

General Safety & Health Provisions

This course is designed for those who want to learn about recognition, avoidance and prevention of unsafe conditions in regulated employments. Topics include definitions, recognition of unsafe conditions, avoidance of unsafe conditions, and prevention of unsafe conditions. This course focuses on the topics covered in OSHA 29 CFR 1926.20 Subpart C.

\$20.00/ 1 hour

Occupational Health & Environmental Controls

This course is designed for people working in the construction industry who are exposed to health hazards and chemicals during the course of their work. Topics include definitions, hazard communication standard, asbestos standards, MDA, lead, worker protection programs, process safety management of highly hazardous chemicals, and cadmium. This course focuses on the topics covered in OSHA 29 CFR 1926 Subpart D.

\$20.00/ 1 hour

OSHA Compliance & Infection Control

Enhance your ability to comply with accepted principles and practices of infections control and to monitor compliance in your office with OSHA's and CDC's recommendations. Includes a protocol manual for your use.

\$60.00/ 10 hours

Industrial Hygiene

This course attempts to introduce the content of OSHA 1910 Subpart Z, which deals with toxic and hazardous substances. This course will focus on the aspects of Subpart Z which deal with keeping hazardous chemicals and materials from negatively affecting your health. This includes the use of personal protective equipment, cleaning procedures in the event of exposure to hazardous materials, and the procedures in place for conducting first aid and recording an incident of exposure in the workplace.

\$20.00/ 1 hour

HIV/AIDS: Public Health Issues

A two hour update of HIV and AIDS so you can educate the public, and meet your legal and ethical responsibilities toward patients with HIV infection.

\$25.00/ 2 hours

Bloodborne Pathogens: Advanced

This course is for workers with potential occupational exposure to blood or other potentially infectious materials in the course of performing their assigned duties and tasks. Topics include an overview of the regulatory requirements covering bloodborne pathogens, symptoms of bloodborne diseases, recommended engineering control measures, proper disposal of contaminated materials, selection of personal protective equipment (PPE), corrective actions, information on post-exposure evaluation, and signs and labels. This course focuses on the requirements of OSHA 29 CFR 1910.1030 Subpart Z.

\$40.00/ 2 hours

Viral Hepatitis: Managing Occupational Exposure

Viral hepatitis is transmitted enterically and parenterally by a group of related pathogens that pose a potential threat to health care workers. Meet CDC recommendations concerning occupational exposure to hepatitis and develop plans addressing counseling, management, and therapy for exposed workers.

\$40/ 4 hours
